Project Title: FRUiTS.

I'd like to build a website in homage to the Japanese street fashion magazine *FRUiTS*, one that is a single page rather than multiple pages. The website will highly prioritize imagery rather than text, showcasing some of the top styles over the twenty-year lifespan of the magazine.

- The aesthetic of the website will parallel that of the magazine itself; in other words, clean layout, the iconic FRUiTS type, etc. Hovering over the images will present the following text/content of the Wikipedia page:
- **Content**
- **Western reception**
- **Closure**
- **Sources**
